

Gayle Lawrence - Journeys of Discovery Presents
"Animal and Nature Communication Workshop"
Seacrest Wolf Preserve Chipley, Florida Feb. 15 – 19, 2015

Experience Wolves & Other Wondrous Creatures!
With author and animal communicator, **Mary J. Getten**

Have you ever wondered whether humans can really talk to animals or nature like rocks, trees, plants and Mother Earth herself? The answer is definitely Yes! Telepathic, or mind to mind communication is an ability we are all born with. As we develop speech at a very young age, humans become socialized out of this skill. All life forms are made of energy and connected by a vast web of energetic pathways; distance, time and space are not barriers to communication with any species whether animal, rock or tree. Telepathic communication can be words or thoughts, images, feelings or subtle impressions and emotions. Mary's workshop will give you the foundation to reawaken your natural telepathic skills not only with animals, but the consciousness of all life forms that surround us. [Visit Mary's website:](#)

An excerpt from “*Thinking Like a Mountain*” by Aldo Leopold

We reached the old wolf in time to watch a fierce green fire dying in her eyes. I realized then, and have known ever since, that there was something known only to her and to the mountain. I was young then, and full of trigger-itch.

I thought that because fewer wolves meant more deer, that no wolves would mean a hunters' paradise.

But after seeing the green fire die, I sensed that neither the wolf nor the mountain agreed with such a view."
